## **ANNOUNCEMENT FOR THE EXPORTERS OF LYCHEE**

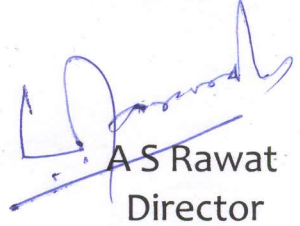

Ref.No.FFV-Indo-USTPF-III/000054

Dated : October 15, 2014

This is with reference to the discussions held with USDA, US side has allowed Market Access for Lychee after sulphite and cool treatment. They have mentioned that detectable levels of sulphite at or above 10 ppm may be indicated on the food label for Indian lychee.

US side also clarified that the same would still be covered in the category of fresh fruits and not processed food.

In view of the above, exporters are requested to strictly adhere with the above condition while exporting fresh lychee to USA.
