

Scope of Work for Study on Protection of Floriculture Varieties of Roses

- a) Listing of important varieties currently grown in India for exports especially of roses.
- b) To ascertain the status of protection of the varieties grown requiring payment of royalties in the EU.
- c) The protection status should cover information on:
 - i) Trade / Commercial name(s) of the variety
 - ii) Denomination name(s) or the name(s) under which the variety is protected in the Community.
 - iii) Name of the breeder / breeding organization
 - iv) The type and scope of protection (PBR, Patent, etc.)
 - v) The authority / organization granting the protection.
 - vii) Date of grant of protection, the period of validity and renewal made, if any
 - viii) Whether granted protection as an initial variety (I.V.) or essentially derived variety (E.D.V.)
- d) Studying the impact of royalty on growing operations
- e) Interaction with the players of important varieties for the purpose of identifying their commercial / trade names;
- f) Preparing the analysis as per TOR.
- g) Provide suggestions for equitable models to be followed in the future
