

Sub: 10% concession in fee charged to the APEDA registered exporters by the APEDA recognized laboratories

APEDA has been providing financial assistance to its recognized laboratories under the scheme for quality development. As a result all the laboratories recognized by APEDA have upgraded themselves in terms of instrumentation as well as on methods of sampling and analysis.

Assistance for upgradation to the laboratories recognized by APEDA is provided subject to extending 10% concession in fee charges to the APEDA registered exporters. APEDA recommends that the exporters should demand for 10% rebate in fee charges pertaining to sampling and analysis of their consignments. The laboratories would extend 10% concession to the exporters over and above the negotiated fee. In case the laboratories express reluctance to extend 10% concession to the exporters, the exporters are suggested to report it to APEDA in the following email address:
