

SAUDI FOOD & DRUG AUTHORITY

SFDA.FD 382/2018

**MAXIMUM LIMITS OF PESTICIDE RESIDUES IN
AGRICULTURAL AND FOOD PRODUCTS**

SAUDI FOOD & DRUG AUTHORITY

Foreword

Saudi Food and Drug Authority is an autonomous body. The main purpose of this organization is to monitor food, drug and medical equipments-And its function is to issue technical regulations and specifications in the fields of food, drug and medical equipments and products either imported or locally manufactured. Food Sector in the authority has updated the Gulf Saudi Technical Regulations vide No. SFDA FD./GSO 382, 383-Maximum limits of Pesticide Residues in agricultural and food products. The draft has been updated after reviewing the concerned specifications and the technical regulation has been approved in the meeting of Board of Directors (17) on 16/9/1439H (31.05.2018).

SAUDI FOOD & DRUG AUTHORITY

Maximum Limits of Pesticide Residues in Agricultural and Food Products

1. Field and Scope of Application

This standard is concerned with maximum limits for the following pesticide residues in or on agricultural food and agricultural products.

2. Complementary References

2.1 GSO Standard, approved by the authority on “ Sampling for Determination of Pesticide Residues in

Food and Agricultural Products”.

2.2 GSO Standard, approved by the authority on “ Methods of Determination of Pesticide Residues in Food and Agriculture Products.

3. Definitions

3.1 Acceptable Daily Intake (ADI)

“ ADI” of a chemical is the daily intake which, during an entire lifetime, appears to be without appreciable risk to the health of the consumer on the basis of all the known facts at the time of the evaluation of the chemical by the Joint FAO/WHO Meeting on Pesticide Residues (JMPR). It is expressed in milligrams of the chemical per kilogram of body weight.

3.2 Extraneous Maximum Residue Limit (EMRL)

“ EMRL” refers to a pesticide residue or a contaminant arising from environment sources other than the use of a pesticide or contaminant substance directly or indirectly on the commodity. It is the maximum concentration of a pesticide residue or contaminant recommended by the food committee to be legally permitted or to be acceptable in or on a food, agricultural commodity, or animal feed. The concentration is expressed in milligrams or pesticide residue or contaminant per kilogram of the commodity.

3.3 Good Agricultural Practice in the Use of Pesticides (GAP)

“ Gap” means official recommendations or permission to use pesticides under actual conditions at any stage including production, storage, transport,

distribution and processing of food commodities and animal feed, taking into account the differences in the requirements and needs in various regions- And some that take into account the minimum necessary quantities for proper control in an appropriate manner that leaves the least amount of residues, to be accepted in terms of toxicity. Good agricultural practice also include recommendations that are necessary for various operations including preparation of dosage ratio and repetition of application before harvesting, permitted by the authorized or national agencies.

3.4 Limit of Determination (LOD)

“ Limit of determination” is the lowest concentration of a pesticide residue or contaminant that can be identified and quantitatively measured in a specified food, agricultural commodity, or animal feed with an acceptable degree of certainty by a regulatory method of analysis.

3.5 Maximum Residue Limit (MRL)

“ MRL” is the maximum concentration of a pesticide residues (expressed as mg/kg), recommended by the Codex Alimentarius Commission to be legally permitted in or in food commodities and animal feeds. MRLs are based on GAP data and foods derived from commodities that comply with the respective MRLs are intended to be toxicologically acceptable.

3.6 Pesticides

“ Pesticide” means any substance intended for preventing, destroying, attracting, repelling, or controlling any pest including unwanted species of plants or animals during the production, storage, transport, distribution, and processing of food, agricultural commodities, or animal feeds or which may be administered to animals for the control of ectoparasites. The term includes substances intended for use as a plant-growth regulator, defoliant, desiccant, fruit thinning agent, or sprouting inhibitor and substances applied to crops either before or after harvest to protect the commodity from deterioration during storage and transport. The term normally excludes fertilizers, plant and animal nutrients, food additives and animal drugs.

3.7 Pesticide Residues

“ Pesticide residue” means any specified substances in food, agricultural commodities, or animal feed resulting from the use of a pesticide. The term

includes any derivatives of a pesticide, such as conversion products, metabolites, reaction products, and impurities considered to be of toxicological significance. The term "pesticide residue" includes residues from unknown or unavoidable sources.

3.8 Temporary Acceptable Daily Intake

"Temporary ADI" is an acceptable daily intake established for a specified, limited period to enable additional biochemical, toxicological or other data to be obtained as may be required for estimating an acceptable daily intake. A TADI estimated by the Joint FAO/WHO Meeting on Pesticide Residues normally involves the application of a safety factor larger than that used in estimating an ADI).

3.9 Animal feed

: Harvested fodder crops, by-products of agricultural crops and other products of plant or animal origin which are used for animal feeding and which are not intended for human consumption.

4. Requirements

Pesticide residue limits in or on food, agricultural commodities or animal feeds shall not exceed the limits given against each in the following Tables.

5. Sampling

Sampling shall be carried out according to the GSO standard approved by the authority to assess. Pesticide residues in food and agricultural products.

6. Methods of Testing

Pesticide residues shall be determined according to the GSO standard to be approved by GSO on "Methods of testing for Pesticides Residues in Agricultural and Food Commodities".

Table: Maximum Limits of Pesticide Residues

SUBSTANCE	COMMODITY	MRL	REMARKS
2,4-D	Berries and other small fruits	0.1	
	Citrus fruits	1	The MRL accommodates post-harvest treatment of the commodity
	Edible offal (mammalian)	5	
	Eggs	0.01	At or about the limit of determination
	Hay or fodder (dry) of grasses	400	
	Maize	0.05	
	Maize fodder (dry)	40	
	Meat (from mammals other than marine mammals)	0.2	
	Milks	0.01	
	Pome fruits	0.01	At or about the limit of determination
	Potato	0.2	
	Poultry meat	0.05	At or about the limit of determination
	Poultry, Edible offal of	0.05	At or about the limit of determination
	Rice straw and fodder, Dry	10	
	Rice, Husked
