

Date: 30.01.2013

ADDENDUM

Further to Amendment-III dated 09.01.2013 in the Trade Notice No. APEDA/PPP/Q/2011 dated 27.06.2011, following changes are made in the Regulation of Export of Peanuts and Peanut Products through Control of Aflatoxins.

1. Exporters shall ensure that all Peanuts and Peanut Products (PPP) units from whom they source the produce have made their data (Name & address, capacity, etc. of the unit) available to IOPEPC for submission to Peanut.Net by 31.03.2013 since Customs would only accept Certificate of Export through Peanut.Net w.e.f 01.04.2013, as advised by APEDA to them.
2. Exporters shall ensure that all PPP processing units (including integrated peanut processing units, peanut shelling units, peanut grading units, peanut shelling-cum-grading units, peanuts godowns/storage) whose data is made available to Peanut.Net by 31.03.2013 would need to obtain HACCP certification by 31.07.2013, as given in Para 3.4 of the said Regulation.
3. Exporters shall ensure compliance with the aflatoxin levels as specified in the said Regulation and moisture levels (not exceeding 7%) in the PPP for export.
4. The amendment as above would be applicable for exports of PPP to countries other than Russia and EU only.

Other provisions stated in Regulation of Export of Peanuts and Peanut Products through control of Aflatoxins dated 27.06.2011 (Amendment-III dated 09.01.2013) shall remain unchanged.
